K100D eliminates water in the fuel to prevent winter freeze-ups. It improves fuel performance by altering the burn chemistry for more complete combustion, boosting the cetane rating, reducing black smoke, pollutants and emissions. K100's unique organic chemistry will even "fix" equipment that has been sitting dormant and won't start – or runs rough!

•For use in all Diesel engines

- Eliminates water and gelling (freezing) of diesel fuel
- Thaws gelled diesel in 20 mins (must add to filter & tank)
- Increases Cetane ratings, power and milage
- Replaces lost lubricity in LSD, ULSD and K-1 winter blends
- Cleans engines and fuel systems for better mileage, easier starts, smoother idle, more power and better acceleration
- Reduces black smoke, unburned hydrocarbons, CO and particulate emissions - stabilizes fresh diesel fuel & revitalizes old fuel
- Reduces maintenance costs and down time and extends engine life.

Use (½ oz. per gallon)

•1 bottle(8 oz.) treats up to 227 liters (60 gallons) of diesel fuel

- Never have to drain water from separator in filter
- Can be used in bio diesel & home heating oil
