FUEL TREATMENT

GAS

K100 Fuel Treatments are proprietary formulations of complex engineered organic compounds developed to eliminate water in fuels, remove gum and varnish deposits and stabilize fuel. K100S adds lubricity, corrosion protection and boosts octane ratings by 2 points. Its ALL- IN ONE Chemistry is all you will need to keep your engines running right.

- **For use in all Gasoline engines**
- Prevents phase separation in ethanol blended gasoline (mixes gas, ethanol and water into a burnable fuel)
- Eliminate water which causes fuel injector and driveability problems
- Non petroleum based organic compound - Bio based green product
- **1 bottle(8 oz.) treats up to 75 liters (20 gallons) of gasoline fuel**
- Designed for use in 2 stroke and 4 stroke engines
- Stops oil thinning caused by ethanol in 2 stroke gas/oil mixture
- Cleans fuel injectors and reduces CO emissions 80-90% and HO emissions 65-80%

**INCREASE SAVINGS, DECREASE COSTS**
